PROFESSIONAL SUMMARY

Full-Stack MERN Developer with 4 years of continuous experience (2021–Present) building and deploying scalable web applications across e-commerce, fintech, property management, SaaS, and service booking domains. Proficient in React.js, Next.js, Node.js, Express.js, MongoDB, and TypeScript. Experienced in leading full-stack feature development, RESTful API integration, third-party service connections (HubSpot, Supabase), and cloud deployments. Proven ability to deliver clean, high-performance user interfaces and robust backend systems in both team and independent settings.

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Redux / Redux Toolkit, ShadCN UI, Responsive Web Design

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, OAuth 2.0, Server-Side Rendering (SSR), Server Actions

Databases: MongoDB, Firebase, PostgreSQL, Supabase, NoSQL & Relational Schema Design

Tools & Deployment: Git, GitHub, Vercel, Railway.com, Netlify, npm

Concepts: MVC Architecture, Role-Based Access Control (RBAC), Third-Party API Integration, Agile Collaboration

WORK EXPERIENCE

AppCrates

Feb 2025 – Present

MERN Stack Developer | Full-Time

- **Responsive UI Development:** Designed and built high-performance UIs using React.js, Redux Toolkit, and Tailwind CSS for production-grade applications.
- **Database Management:** Designed and managed NoSQL databases (MongoDB, Firebase) with optimized data modeling for scalable storage.
- **Performance Optimization:** Improved application speed through Next.js server-side rendering (SSR), lazy loading, and code-splitting techniques.
- **Deployment & Collaboration:** Collaborated via Git/GitHub; deployed frontend on Vercel and backend services on Railway.com.
- **Cross-Domain Delivery:** Delivered features for a crypto trading platform (Buycex), a construction management system, and a cricket analytics platform.

Auxilium Digital

Jun 2024 – Jan 2025

Frontend Developer (Full-Stack on select projects) | Full-Time

- **Frontend Engineering:** Developed responsive, pixel-perfect interfaces using React.js, Tailwind CSS, and Next.js for client-facing web products.
- **Full-Stack Contribution:** Took ownership of complete MERN stack features on assigned projects — built APIs in Express.js, managed MongoDB collections, and integrated JWT authentication end-to-end.
- **Third-Party Integrations:** Worked with HubSpot OAuth 2.0 and Supabase backend services, handling client-side flows and server-side data synchronization.
- **Code Quality:** Maintained reusable component libraries and collaborated with senior developers on architecture decisions.

Adex360

Nov 2023 – May 2024

Web Application Developer | Internship

- **Assisted senior engineers** in React.js and Express.js project implementations across multiple client e-commerce projects including Ismail.

- **API & Database Experience:** Gained hands-on experience integrating RESTful APIs and managing both relational and non-relational databases.
- **Delivered production-ready UI components** that improved front-end functionality and user experience on live platforms.

Self-Directed

Nov 2021 – Oct 2023

Full-Stack Developer in Training | University + Personal Projects

- **Built multiple end-to-end web applications** including a property management platform, a notes app with JWT auth, and a car wash booking system.
- **Developed strong foundations** in MERN stack, responsive design, and deployment through hands-on project work alongside university coursework.

KEY PROJECTS

Buycex – Crypto Trading Platform <https://www.buycex.com/>

Professional trading platform with real-time market insights, user dashboards, and asset management. Built secure auth flows, scalable APIs, and a high-performance frontend for fast data rendering.

Cricap – Cricket Analytics Platform <https://web.cricap.com/>

Full-featured cricket platform delivering live scores, match analytics, and community engagement tools with real-time updates and optimized APIs.

ServiSmart – Car Wash Service Booking <https://servi-smart-jk8p.vercel.app/>

Full-stack booking platform using Next.js and Express.js. Features user authentication, booking management, and an admin dashboard with a responsive Tailwind CSS UI.

Smuves – HubSpot Backup Dashboard <https://earnest-maamoul-0015ec.netlify.app/>

Next.js 14 dashboard with Server Components, Supabase PostgreSQL backend, multi-method auth, and HubSpot OAuth 2.0 integration for real-time data sync and reporting.

Construction Management Platform <https://appsoapro.techbytech.tech/>

Full-stack platform for managing construction projects, teams, and blueprints. Super Admin dashboard, role-based access, and automated workflows built with React, Express.js, and MongoDB.

coLiver – Property & Room Booking <https://earnest-maamoul-0015ec.netlify.app/>

Responsive property listing and booking platform with landlord dashboard, tenant booking system, and payment integration. Built with React, Tailwind CSS, and Firebase.

EDUCATION

Superior University, Lahore

Nov 2021 – Jan 2026

Bachelor of Science in Software Engineering

LANGUAGES

English (Fluent) **Urdu** (Native)
